6 year-old Frida is taken to live with her aunt and uncle after her parents have died. She befriends their 3 year-old daughter, but the summer is not as idyllic as it might seem...

'In its subtlety, richness and warmth it is entirely beguiling – complex and simple at the same time. It is also very moving. 'Summer 1993' is about childhood and a child's fraught relationship to the adult world, and has some of the most miraculous child performances I can remember seeing recently, although the concept of "performances" and "acting" are

meaningless with children this young: two little girls of six and three years old...What a lovely film it is' - Peter Bradshaw, Guardian.

This is Carla Simón's first feature film; she and the film have garnered many nominations and awards, including the Berlin Film Festival, where the film won her the Best First Feature Award.
